Bees

Summary

In this story it tells about honey bee how hard they work for us. They never sit idle that's why people call them "busy bee".

The body of honey bee divided into three main parts. The head section, the mid section and the back section. If we talk about head section they have eyes, feelers and mouth. In mid section (thorax :- middle part of body) has wings and legs and the abdomen has a sting at the end. They have six legs and two tiny wings when they fly they makes buzz sound. They collect juice from flower to flower which is called "nectar". They store it and after some times the nectar convert into "honey" which is their food. The place where honey bee is living are called beehive. Many rooms are there they called as "cell". Their family is very large all of them work very hard to collect one table spoon of honey they have to visit 4000 flowers. The king and queen also live with

them. They both does not do any thing they
remains idle.
